Swami's Soul University Talks

Swami Gives Topics for Questions

Talk at the Ashram

May 12, 2009

Swami: Write creative questions mind, heart, soul, Spirit, Divine Spirit, Angels, Mother or Shakti, difference between birth and death. Create questions to that. Where you consider the birth? Where you consider the death? A mango seed is it birth or death? In an egg, is it a dead egg or birth egg? So what inside makes it activated? In your body something activated like a seed, how to make something, your soul, to come out to make it activate as a tree, to grow as a tree and blooming. Coming to you, from soul, to Divine spirit, then angels, then become Avatar like God.

Difference between the Kalachakra, and Kamachakra, where is the seed of the Kalachakra? Where is the seed of the kamachakra? Talk little science too. Something beyond the science is hidden, what is it? Then you can take anybody's philosophy... you can take Vivekananda's philosophy, Ramana Maharshi's philosophy, Paramahansa Ramakrishna's philosophy, Babaji's philosophy, Yogananda's philosophy, Shirdi Baba's philosophy, all philosophies come in one point - that's it, everything is there. Root is the same - branches are different. The root, the main root, get it.

On these subjects, review for a week or ten days. Create questions, then I might participate happy to explain to you guys one more

big review. Like several days talk, then it helps a lot. If you take a simple normal the nature example, a nature example, how the nature is reacting in each creation, what is electron, neutron, proton... go, go, go be in that. If you review that then you have the real subject, a diary with you. Normal content of spirituality - you have it.

Then the discharging & healing techniques subjects, later on the senior students will take care. On these try to prepare as many questions you can. Once if you have the questions, I'm happy to answer it. If you don't have the questions, I can't clarify your mind and your heart. Asking the questions also is a talent. Pulling the information on the knowledge is a talent. Understand?

I come to create something what I give you in a different way, and I talk different way. Now we'll go in practical way, systematic way we'll go. Then the University classes will be finished in a beautiful way. So create the questions tomorrow on these topics. At least a minimum three hundred questions, maximum one thousand. This semester needs to make like a book, complete as a book. You understand? This book will help coming generations people and many your future students on these topics. Good luck. Carry on.

End of Talk
