**Swami's Soul University Talks**  
Student Questions: Samadhis, Power Objects, Egypt  
Talk at the Ashram  
June 3, 2009

Swami: Everything okay? Hello?

Students: Yes.

Swami: Hot, still hot, the rain should start soon. I saw your country Germany - so nice. I really enjoyed it. I went to Czech, from Czech to Beuerhof, Germany. I drove almost thirteen, fourteen hours. It was a long way to drive. It was nice, hundreds of people - a beautiful concept and beautiful bhajans. Hopefully I might visit also, very soon to the United States Nityaanada.

Nityaanada: Please.

**Swami:** Planning in August to visit Switzerland, then go to America after that. Sounds good?

Nityaanada: Yes.

**Swami:** In August... it's enough time you have?

Nityaanada: It will be whatever it is, no problem. We're happy to have you anytime. You can come next weekend and we fix it.

**Swami:** How many questions you guys prepared?

Simon: I think we have over eight hundred plus.

**Swami:** Give the first one hundred list out. Do you have it here?

Simon: So the groups are still working on putting them in a beautiful order, like a book, so it reads with easy questions first. So the reader can go through to more difficult questions.

**Swami:** So I still need to wait more time?

Simon: No. We have got some... I can give you the general theme of each group if you'd like. We have a print out for you. So each group worked on different topics. Saints and their philosophies was one group. They went into the depth on different saints to find the root and similarities between the different philosophies. One group worked on mind, heart, soul, divine soul, spirit, divine spirit, avatar, Mother Divine, shakti. So that one group covered all of those subjects.

**Swami:** Okay, which category I am - your judgment?

Simon: Avatar.

**Swami:** Which avatar?

Simon: The highest avatar.

**Swami:** Be straight, which avatar I am. Is this a saints dress what I'm wearing?

Constanze: It counts what's inside.

**Swami:** What do you mean inside? Tatyana, which avatar belongs I am? I wear the gold chains, diamonds, western suit, sunglasses... Even today you see me in jean's shirt. It's just hanging there, why can't I just wear it? It's sitting there; why can't I wear it, wear the Jeans? Any avatar wear the jeans?

Simon: Vishnu.

**Swami:** Vishnu wears jeans? Even he don't know the jeans. Well then next?

Simon: There's another group that focused on life and death. (Swami nods approving) Trying to discover the seed. And they went deep into the creation mechanism, the nada bindu, and researched.

Swami: That is Myuri subject? That was Myuri's wrote that point?

Simon: No, you asked that point. That was one of the subjects. Then one group focused on the Kala, Kala Chakra and researched that in depth, and another group focused on the Kama Chakra. And we also had a small science group for a short period researching on the science and the links between some of the discoveries of the yogis - the electrons, protons, neutron, going deeper into the structure and linking that through to what energy is there at the lowest level so, for example, the relationship between the black hole and the nada bindu.

And looking at sankalpam and how the thoughts can change different things, like water for example. They're have been various experiments that show the structure of water changes, so our thoughts are very powerful and can have a powerful affect on somebody because they are majority water. So that was the science group research. We tried to find the links and bridge between the two.

**Swami:** Science was born through spirituality. So far whatever they discovered, several thousands of years back, already in spirituality they told about it. The saints, they already told it - through the water they made the electricity. There's a flights... on the day the Divine flights was there. On the day the saints clearly wrote it in Kalagyana - Vira Brahmendra.

I really recommend, have one trip to go to either Guru Ragavendra or Virabrahmhendra Samadhi, Jiva Samadhi. If you can work on the samadhis, mummies, pyramids, samadhis, jiva samadhis, yoga Samadhi, then majority I can explain to you on the bliss levels: brahmananda, satchitananda, chinmayananda, nityanada — eternal love, eternal bliss. You personally have to go and see that samadhi how they made it. So Tatyana, when are you going to Egypt?

Tatyana: When I'm ready? Anytime. You said before Guru Purnima.

**Swami:** I told to them in Germany that the Elephant Group is going to Egypt and get a power object from there, pull it out, then bring it back to India. How many hours flight that is, Nityaanada?

Nityaanada: I don't know to Dubai, maybe ten, eleven hours? Change planes maybe.

**Swami:** Today in this Mandir, where is the power object? There is a power spot; one power spot is here. That power spot is giving entire the energy. In the Dwarkamai there's one power spot. In my bedroom there is one power spot. There's a huge temple; one power spot is there. In entire the pyramid, there's only one power spot. Entire in Hampi there's only one power spot, and one power object. Once it's gone - crashed! Power Object

So you need to concentrate on that. The questions like, who am I, where I'm coming from, of course it's not a big deal. Enlightenment. What enlightenment? To be in the Oneness, to be

in Oneness is not a big deal, not a big deal. It's not a big deal - you're born as a human, that's pretty good, already you made it. For example, you like your wife, you really love her, how many hours you can hold her in your arms? Twenty minutes? In the worst case, one hour?

**Simon:** Oh sometimes we fall asleep like that, so we can spend all night like that.

**Swami:** But you're sleeping. But awake, how many hours you can hold her in your lap?

**Simon:** Maybe a few hours.

**Swami:** Then after?

**Simon:** Maybe your body gets a bit uncomfortable.

**Swami:** You lose it. You lose that friction. Not losing friction that is the Oneness. You should not lose the friction - that is the Oneness.

**Simon:** So what's stopping that?

**Swami:** I'll explain. I'll explain. They are so interesting the Germans, these guys. They made the tent, well organized - very good unity! Wow, nice climate. Until morning 3:30, 4 a.m. I'm at the fire pit, everybody chanting and meditating. You enjoyed it Tatyana?

**Tatyana:** Yes very much.

**Swami:** You Carla?

Carla: Yes, very much.

**Swami:** You sure?

Carla: Yes.

**Swami:** And also you laughed a lot isn't it. Finally in my car on the huge journey we are laughing and laughing at one stage. She started crying with laughing. She cannot laugh anymore, she's with the huge tears, she's like... I'm just making the jokes. I can't make the jokes, it's recording. It's horrible jokes. Just it goes, straight out.

So try to fix one time, one date, sometime we'll go to Virabrahmhendra or Guru Ragavendra. Try to work on power objects, samadhis - the vibrations, intense vibrations. Then you'll really... I think few people saw the movie "Arundati" isn't it? Can't able to watch that anymore, it's like ooohhh! It's a concept. It's a concept.

So, to make it squeeze your soul in a beautiful soul, squeezing your soul in a beautiful way, that much power you gain it. The top instrument is your body, and receiving the cosmic energy to in you. With this vibrations maximum we can live a hundred and ten, to a hundred and twenty years. But if you're in the different vibrations with different objects you can be alive for 2,000 - 3,000 years. It's proved. It is? Proved. No problem. What is the story 2012, something the globe is going to get crashed. I read in the newspaper when I'm coming in the flight. What kind of story that is?

Simon: I think it links to the Mayan Calendar. There's lots of stories about some catastrophe happening.

Student: A planet is supposed to hit the Earth. It's the same planet that apparently hit the planet a very long time ago and tilted the axis to the degree that it is now. And this allowed the creation to happen because of the degree it's facing towards the sun. And that can create the seasons and made life on this planet possible. And apparently that planet is supposed to hit us again, or come close to us.

Swami: If it comes close, what happens? How much you believe it Nityaanada?

Nityaanada: I don't believe it at all. No.

**Swami:** No need to worry. So, try to work on that area to your questions. There's a chance, might chance, I can read eight hundred questions, going eight, nine hours straight my talk. Done! And I think Nityaanada, when are you going to release your book?

Nityaanada: Before Guru Purnima. Could be done in a week, short time.

**Swami:** How much time?

Nityaanada: Few hours, few hours.

**Swami:** By 2011 I'm taking a lifetime vacation or what? You don't agree?

Constanze: Well, I wish you the best, wish you holidays, but I can't see it.

**Swami:** Tonight or tomorrow I have to go to Hyderabad. I'm making a movie.

Constanze: It's work.

**Swami:** They want me to sign a movie. The movie majority is about the youth, how they're getting addiction to drugs, the children from school days... And the farmers, what type of fertilizers they're using it, and what type of diseases they're receiving it if they keep using it for twenty, thirty, fifty years, eighty years later, what type of diseases they might suck it - that's my story. But we'll watch that reality. So I'm going to sit with a few guys and we'll start choosing the characters. Beautiful comedians are there. To give the idea to the scientist, all the stuff, whatever we're using the rice, the fruits with tons of fertilizers - we're taking slow poisons - that we need to avoid. Then I'll be busy just from 2011 just making movies. Taking my camera and just run wherever. You don't want me too?

Simon: You've made your decision.

Swami: What do you think Nityaanada?

Nityaanada: I accept. I can't see you doing it, but I can see you do anything. But I don't know how you can disappear off the planet. Wherever you are, you work.

**Swami:** I know that's... but how much you really believe it, that's my question?

Nityaanada: Well that I believe more than a planet hitting the earth.

**Swami:** Ooooh.

Nityaanada: I do, but it's small.

**Swami:** A great surgeon can prepare other surgeons. Once I prepare you as surgeons, guys, for awhile better to sit and observe how you're doing operations. How you're doing operations. If it's really critical operation, you call the specialized person - I'll be there. Then I'll walk out.

I'm so glad you're learning Telugu guys, so glad. At least a few guys at least are learning Telugu. That makes me really happy. To overall the books, that need to get translated - a hundred men to do a hundred years nonstop - that much information. One hundred men scholars, hundred years nonstop if they worked, that much information we have it. You can read the whole Bible within maybe maximum one week. The Bhagavad Gita can read it within a week. That many saints they've written it, and we have it, and we preserved it.

That information, once it comes out, is the biggest spiritual revolution in the planet in a beautiful way. I have no idea the sankalpam how Baba is making it to work out in a beautiful way. That needs to come out. That needs to come out. Done. I don't want to be like a Ramana Maharshi, or a Shirdi Baba, or like Muktananda, Yogananda — I am Ananada — that's it. No Mukti-ananda, no Muktananda, forget it. I'm Ananda - that's it.

So when we'll go to see that samadhi? Ann? It's only possible before Guru Purnima.

Student: Tomorrow.

**Swami:** We need to prepare. Somebody needs to go ahead before earlier and prepare the rooms, and we can stay one night there near a beautiful river, take a holy bath. Spend some time and ask some information about it. Collect some books on it.

And 550 people are coming to Guru Purnima. You need to be very flexible and unity. You need to be helping each-others, otherwise I'm sorry. They won't fit here (in the mandir), 500 people. If it's

raining everybody has to sit with their own umbrellas and I'm sitting with my own umbrella giving a speech. That's the only way. Everybody has to buy their own umbrella and I just sit, or stand in the garden. Making little stage to me, I stand on the stage and talk. That's a history. That's history. After twenty years later who watches that, "Oh what a guys, these guys, they made it." Anyhow, go for arathi. Can I have this (list of questions)? Just I want to look at it, have idea which angle you're going through.

Simon: So tomorrow we could talk on the samadhis, different types of samadhis go in depth on that, and make questions from that?

**Swami:** Yeh. Good. Take care.

End of Talk
